### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 15 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

### **DETAILED ACTION**

1. The preliminary amendment filed on July 15, 2004 has been entered. Claims 4, 5, and 10 have been amended. Claims 1 – 10 are pending.

#### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 – 5, drawn to a coated, woven fabric comprising filaments with a flattened cross-section.

Group II, claims 6 – 10, drawn to a method of making a coated, woven fabric comprising filaments with a flattened cross-section.

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The groups do not have a common special technical feature because the features common to both claims, i.e., a coated woven fabric, made from filaments having a flattened cross-section and woven such that the major axis of the filaments is substantially parallel to the horizontal direction of the fabric, is taught by JP 7-252740 A. JP 7-252740 A discloses a woven fabric made from filaments having a modified cross-section with a degree of compression of 1.5 or more and shown in Figure 1 (paragraph 15). The major axis of the filaments are placed parallel with the horizontal surface of the fabric, thus HI would be approximately 1 (paragraph 18). And the woven fabric can be used in coated or uncoated airbag fabrics (paragraph 44). Thus, the claims do not have a common special technical feature since the common features in both groups are taught by the art and are not considered a contribution over the prior art.

4. A telephone call was made to T. Daniel Christenbury on August 2, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1771

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jenna-Leigh Befumo whose telephone number is (571) 272-1472. The examiner can normally be reached on Monday - Friday (8:00 - 5:30).
